

Canon PIXMA Printers Customer Compliments

A Canon PIXMA printer is known for its unmatched qualities and benefits. Customers have been found to appreciate it a lot in their reviews. Benjamin E. Sauter, a particular customer who purchased Canon PIXMA MP530 mentions in his review that "I've had this printer for about 6 months now and it has worked flawlessly. It does everything it claims to do and without flaws or complications".

A Canon PIXMA printer is particularly popular among the customers because of its easy, fast and time saving installation process. The users have frequently praised the user manual which contains all the essential steps for installing the printer. Canon PIXMA user manuals have been found to be much more useful in guiding the users through the installation procedure than most of the other companies' guides.

In addition, its customer support is also quite popular among the users who have found it very cooperative and willing to help. L. Lang, one of the customers, praises the Canon PIXMA customer support in the following words "Canon's customer service was very friendly and helpful and I understood the people I spoke with. I did not have to wait for ever to connect to customer service and they did everything to help me out."

Canon PIXMA MP530 has received a lot of compliments about its duplex printing whereby the machine automatically prints on both the front and the back side of the page. It is best known for its separate ink tanks for different colors. This feature makes the printer operation very economical in a way that the entire cartridge does not need to be replaced if just a few colors have finished. In their reviews, the consumers have gladly mentioned that the print heads are also separately constructed and need not be replaced when a new Canon cartridge is bought. Plenty of customers like it for its sleek and compact appearance, which enables it to fit in a little amount of space.

The printing speed is reported to be appreciably fast. The quality of prints is regarded by many customers as being in comparison with the lab quality. The customers have particularly liked the idea of two trays which, according to them, provide the additional service of shielding the papers against dust. L. Ortiz fro USA has praised a Canon PIXMA machine by writing that "I love this printer."

Most of the customers are of the view that a Canon PIXMA printer is much more affordable than many other brands in the market. A Canon PIXMA machine is like by a lot of customers because they find it good to look at. Consumers have found it useful for printing all kind of materials and are highly pleased with the print and color quality.
